Which areas of epidemiology interests you most? *

Areas of epidemiology

Needs Assessment: The collection and analysis of information that relates to the needs of affected populations and that will help determine gaps between desired outcomes and current measured outcomes.

Data analysis: This includes survey/surveillance design, data collection, data cleaning, statistical coding, analyses, and interpretation of results.

Program Monitoring and Evaluation: This focuses on operationalization progress and outcome indicators, creating and maintaining data collection systems, and creating summaries and reports on program strategy and results

Why did you select this area as your top interest? *

Which areas of epidemiology interests you the second most? Please select a different option than you did for the previous question. *
