

GRADUATE STUDENT EPIDEMIOLOGY PROGRAM (GSEP) 2022

What's GSEP?

GSEP is a paid, 10-week, 100% remote summer internship to develop leaders in maternal and child health (MCH) epidemiology. Students complete a substantial project at a matched host site and participate in weekly enrichment and reflection activities.

HOST SITES – DEVELOP THE MCH EPIDEMIOLOGY PIPELINE!

- Health departments (state/territory, Native American or indigenous, local) and non-profit organizations serving state or local health agencies are eligible to apply.
- Provide mentorship and supervision to a full-time (35 hours per week) intern working on a needs assessment, data analysis, or program monitoring and evaluation project of your design.
- No funding commitment required; AMCHP pays and administers all intern stipends.

STUDENTS – GAIN REAL PUBLIC HEALTH EXPERIENCE WITHOUT RELOCATING!

- Currently enrolled students with a strong, demonstrated interest in epidemiology and MCH are eligible to apply.
- Put epidemiology concepts into practice at a matched host site while receiving professional mentorship.
- Explore career tracks and MCH population domains through enrichment and reflection activities with peers from across the country.

Host Site Applications: Rolling application period opens December 2021: closes by March 16, 2022

Student Applications: Applications accepted February 1 - March 1, 2022
