

# INCREASE FUNDING FOR THE TITLE V MATERNAL & CHILD HEALTH BLOCK GRANT

The Association of Maternal & Child Health Programs (AMCHP) calls on Congress to fund the Title V Maternal and Child Health (MCH) Services Block Grant at **\$1 billion for FY2023**.

The MCH Block Grant, authorized by Title V of the Social Security Act, is the only federal program of its kind devoted solely to improving the health of all women and children in the United States. It is guided by the principles of evidence, flexibility, and results. **In FY2020, programs funded by the MCH Block Grant served 93% of pregnant women, 98% of infants, and 60% of children nationwide.**

	FY20	FY21	FY22	FY23 (Request)
<b>MCH Block Grant (in millions)</b>	\$687.7	\$712.7	\$747.7	\$1,000

Increased investments in the MCH Block Grant are needed to scale effective public health programs, meaningfully impact more families, and address long-standing racial, ethnic, and geographic inequities in maternal and child health outcomes. The MCH Block Grant is the backbone of our nation’s public health infrastructure for women, children, and families, but that infrastructure was severely strained during the pandemic. Title V needs sustained, increased funding to best serve our nation’s families now and in the future.

### Priority Areas for MCH Block Grant State Formula Funding

- Improve pregnancy, birth, and infant health outcomes
- Reduce maternal, infant, and child mortality
- Eliminate disparities in health outcomes
- Promote family-centered care for children with special health care needs
- Support child and adolescent mental health
- Assure access to high-quality public health and health care services
- Build workforce capacity for local public health and community-based organizations

Another key component of the MCH Block Grant is the **Special Projects of Regional and National Significance (SPRANS)**.

SPRANS funding complements and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women and children.

**Key projects funded through SPRANS include:**

- State Maternal Health Innovation grants
- The Maternal Health Learning & Innovation Center (MHLIC)
- Maternal Mental Health Hotline
- Alliance for Innovation on Maternal Health
- Women’s Preventive Services Initiative
- MCH workforce training programs
- Adverse childhood experiences research
- School-based health services network
- Child and adolescent injury prevention resource centers

**The MCH Block Grant improves the health of women, children, and families by:**

- Supporting evidence-based programs that work
- Providing flexibility to address emerging issues and state-specific maternal and child health needs
- Complementing other federally funded programs, such as home visiting, community health centers, Healthy Start, WIC, autism initiatives, CHIP, and Medicaid

**AMCHP'S ROLE**

The Association of Maternal & Child Health Programs (AMCHP) leads and supports programs nationally to protect and promote the optimal health of women, children, youth, families, and communities. For over 75 years, AMCHP has served as a national resource, partner, and advocate for state public health leaders and others working to improve maternal and child health. AMCHP’s members include directors of state maternal and child health programs, directors of state programs for children and youth with special health care needs, and state adolescent health coordinators, as well as family leaders, community-based organizations, and academic institutions and researchers focused on a common goal of **healthy children, healthy families, and healthy communities**.
