Remote Internship Capacity

With the support of our federal funders and steering committee, and in alignment with AMCHP's commitment to providing equitable access to professional development and capacity building opportunities, all GSEP internships are and will continue to be 100% remote.

Our agency has the capability to facilitate a fully remote internship experience. *

 

What structure will you provide to ensure mutual success (including with interns in different time zones)? What are your expectations of a fully remote graduate student intern? *

AMCHP views internships as bi-directional, i.e., interns complete tasks that contribute to agency priorities and the agency invests time and energy in interns' growth and professional development. How do you plan on providing that support? *

Once the internship(s) conclude, will there be a pipeline for the intern(s) for continued paid work with your organization? *
