Connecticut

Maternal and Child Health Block Grant 2023

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2021, 92% of all pregnant women, 98% of infants, and 58% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

State Spotlight: School Based Health Centers
Connecticut has 92 School Based Health Centers (SBHC) in 27 communities. SBHCs provide access to physical, mental health and dental (in some locations) services to students enrolled in the school regardless of their ability to pay. Services provided to students include: diagnosis and treatment of acute injuries and illnesses, managing and monitoring chronic disease, physical exams, administering immunizations, prescribing and dispensing medications, laboratory testing, health education, promotion and risk reduction activities, crisis intervention, individual, group and family counseling, outreach, oral health (in some locations), referral and follow-up for specialty care, and linkages to community based providers. Being able to treat students while at school reduces absenteeism, saves money by keeping children out of emergency rooms, and supports families by allowing parents to stay at work.

Current Special Projects of Regional and National Significance (SPRANS)
Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.

Healthy Tomorrows Partnership for Children Program
