

Utah

Maternal and Child Health Block Grant 2023

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2021, 92% of all pregnant women, 98% of infants, and 58% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

State spotlight: Child Health Advanced Records Management

The Child Health Advanced Records Management (CHARM) provides public health data through an integrated, secure electronic system to health care providers to coordinate care, and improve efficiencies and health outcomes of the children and families they serve. The CHARM program and system was established in 2000 to link child health data in real time among authorized health care programs and state agencies. The CHARM system also provides a web interface/portal for providers and programs which enables authorized users to obtain newborn screening results (hearing, heel-stick, heart) and immunization histories for children to facilitate more complete and timely health care services. CHARM creates a consolidated electronic health record for children in Utah. This health record can be printed and given to parents/guardians to assist MCH/CSHCN populations (infants, children, teens, mothers, families) and programs with continuity of care and follow-up. CHARM is currently being expanded to include ASQ screening results.

Current Special Projects of Regional and National Significance (SPRANS)

Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.
