

Oregon

State Performance Measure #3: Percent of children living in a household that received food or cash assistance

Priorities: Enhanced equity and reduced Maternal, Child, and Adolescent Health (MCAH) health disparities; Enhanced social determinants of health

Population Domain: Cross-cutting/systems building

Objectives:

- By October 1, 2025 **increase the percentage** of children age 0-17 who have a healthcare provider sensitive to their family's values and customs from 94.0% to 95.2%.
- By October 1, 2025, **decrease the percentage** of households with children that receive food or cash assistance from 42.3% to 41.3%.

Strategies:

- Develop and strengthen systems and partnerships to address food security and overcome barriers to accessing food resources.

Activities:

- Oregon created a state health profile and a State Health Improvement Plan (SHIP) as part of Public Health Accreditation. The SHIP was updated in 2020 to focus on priorities for 2020-24. One of the priorities is addressing economic factors that impact health, such as housing, fair wages, access to food, and transportation. **Title V plays an important role as a partner in all these priority areas.**
