## Maternal and Child Health Block Grant 2024

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2022, 93% of all pregnant women, 99% of infants, and 61% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit [www.amchp.org](http://www.amchp.org).

### MCH Block Grant Funds to Arizona

FY 2020	\$7,441,320
FY 2021	\$7,432,377

## State spotlight: Engaging Families and Young Adults Program (EFYAP)

The Arizona Title V Program is committed to engaging families and young adults throughout all maternal and child population health domains. Through this new program, Title V has established a contract that aims to recruit, train and place family and young adult advisors in programs within Title V and partner agencies to assure families and youth are key partners in health care decision-making at all levels in the system of services, especially those who are vulnerable and medically underserved. The EFYAP implements evidence-based and informed strategies for the provision of orientation, training, compensation, and assessment of engagement activities. The goal is to elevate and ensure engagement will become a standard practice in all MCH work in Arizona to enhance and design programs for women, children, children and youth with special healthcare needs and families.

## Current Special Projects of Regional and National Significance (SPRANS)

Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.
