

Marshall Islands

Maternal and Child Health Block Grant 2024

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2022, 93% of all pregnant women, 99% of infants, and 61% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

MCH Block Grant Funds to Marshall Islands

23.0%	Children and adolescents
100.0%	Children with special health care needs
29.0%	Others

*2022 State/Jurisdiction Annual Reports Submitted to the Maternal and Child Health Bureau

State spotlight: Women's Health

The Marshall Islands Maternal and Child Health (MCH) and Family Planning (FP) mobile visits program visits 14 atolls, including at least six outer islands yearly, to provide cervical cancer screening, breast exam, and family planning services to the hard-to-reach populations in the remote islands. These activities were implemented in collaboration with other public health programs, including STI/HIV, NCD (Diabetes and Hypertension), Immunization, and Dental. Family planning clients are provided with counseling and methods desired, as well as cervical cancer screening and basic prenatal care for pregnant people. The program also conducted one-on-one counseling on the availability and importance of annual checkups, spacing of pregnancy, and early prenatal care.

Current Special Projects of Regional and National Significance (SPRANS)

Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.
