

Minnesota

Maternal and Child Health Block Grant 2024

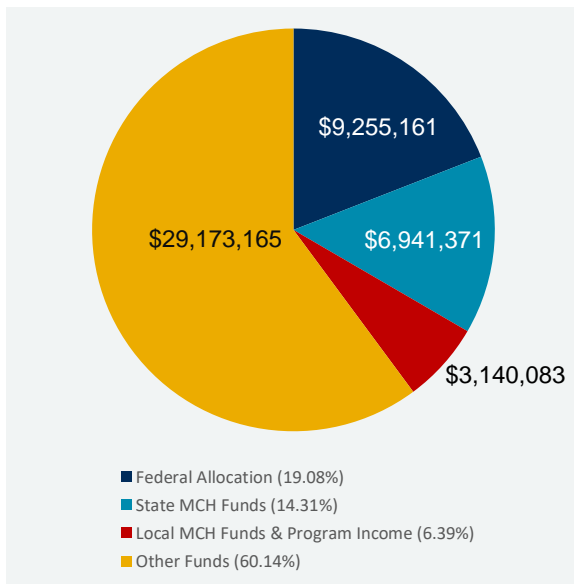

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2022, 93% of all pregnant women, 99% of infants, and 61% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit www.amchp.org.

40.2%	Children and adolescents
100.0%	Children with special health care needs
1.2%	Others

*2022 State/Jurisdiction Annual Reports Submitted to the Maternal and Child Health Bureau

State spotlight: Minnesota Maternal Mortality Review Committee

The Minnesota Maternal Mortality Review Committee (MMRC) works to improve the health of childbearing people by reviewing deaths of people who die in pregnancy, labor, and up to one year postpartum. The committee develops recommendations aimed at preventing future morbidity and mortality through improved policies and practices. The statewide committee includes members who represent the communities most impacted by disparities in maternal health outcomes, working alongside a broad range of healthcare professionals. Minnesota's first report on maternal mortality was released in August 2022, disseminating data for the 48 pregnancy-associated deaths in 2017-2018. This report was updated in January 2024 to include data from 2019 for a total of 75 pregnancy-associated deaths across the three reporting years. The most critical insights uncovered through these reviews were that the leading cause of death was injury, substance use was a cause or contributing factor in nearly one-third of cases, and 100 percent of the pregnancy-related deaths were determined to be preventable.

Current Special Projects of Regional and National Significance (SPRANS)

Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.
