## Maternal and Child Health Block Grant 2024

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. In Fiscal Year 2022, 93% of all pregnant women, 99% of infants, and 61% of children nationwide benefitted from a Title V-supported service. To learn more about Title V, visit [www.amchp.org](http://www.amchp.org).

## State spotlight: Long-Term Follow-up

The Office of Child and Family Services, in collaboration with the Sanford Children's Medically Complex Care (MCC) Program, has expanded services to include long-term follow-up with a licensed social worker. The program aims to improve health outcomes and quality of life for children with medical complexity and their families through better care coordination.

- In July 2023, a social work position was added to the program to provide long-term follow-up services for infants diagnosed with a complex condition through metabolic newborn screening.
- The long-term follow-up program has enrolled eight patients who met eligibility criteria in 2023. The program is expanding and will begin to enroll patients with complex medical needs who received a diagnosis between 2021-2023.
- In the first quarter of 2023, the program documented 94 favorable outcomes achieved, including increased adherence to care plans, emerging or urgent medical needs addressed timely, family enabled to better manage care at home, and needed appointments getting scheduled timely. In the second quarter of 2023, 95 favorable outcomes were achieved across the same categories, and 65 adverse outcomes were prevented through care coordination.

## Current Special Projects of Regional and National Significance (SPRANS)

Special Projects of Regional and National Significance (SPRANS) funding complements the formula funding each state receives and helps ensure the success of state Title V, Medicaid, and CHIP programs by driving innovation, responding to emerging and entrenched issues, and building capacity for integrated systems of care for women, children, and families.
