

Oregon

State Performance Measure #3: Percent of children living in a household that received food or cash assistance

Priorities: Improved factors that influence health

Population Domain: Cross-cutting/systems building

OBJECTIVES

- By October 1, 2025, **decrease the percentage** of households with children that receive food or cash assistance from 42.3% to 41.3%.

STRATEGY

- Partnered with Medicaid to design and implement a **Section 1115 waiver** that expands services addressing health-related social needs for Medicaid members, with a focus on individuals in high-risk transition populations.
- Strengthen **systems and partnerships** to improve food security and access.

ACTIVITIES

Oregon created a state health profile and a State Health Improvement Plan (SHIP) as part of Public Health Accreditation. The SHIP was updated in 2020 to focus on priorities for 2020-24. One of the priorities is addressing economic factors that impact health, such as housing, fair wages, access to food, and transportation. **Title V plays an important role as a partner in all these priority areas.**
